

Engineering Practices Working Group
Fire Protection Subgroup
Initiatives: FY2006

Coordinate 10 CFR 851 implementation planning efforts including the following:

- Identification of need interpretations and implementation questions for submittal to the DOE Fire Council for informational response
- Identification and coordination of implementation guidance for inclusion in the revised Implementation Guide for use with DOE O 420.1B
- Information sharing on the planning actions, documentation format, and related implementation activities to be employed by the various responsible contractors

Provide support to the DOE Fire Safety Committee in the development of the implementation guide for use with DOE O 420.1B, including

- Generate Subgroup review comments on the initial draft
- Support a joint review meeting of the Subgroup and DOE Fire Safety Committee at the DOE Fire Protection and Emergency Services Workshop in Augusta, Georgia (April 26)
- Generate Subgroup review comments on the final draft prior to submittal to REVCOM review

Work out details on what a Fire Protection resource library, linked to the Subgroup webpage, might contain (i.e. list of experts, definitions, list of Equivalencies/Exemptions, etc)

Develop a list of Equivalencies/Exemptions that might be of help to other sites considering similar Equivalencies/Exemptions.
