

# Review of the Nevada Test Site Chemical Program

**Thomas E. Gran, PhD, CIH**  
**Industrial Hygiene Acting Manager**

Presented to  
EFCOG Chemical Safety/Lifecycle Management Subgroup  
**October 9, 2008**

This work was done by National Security Technologies, LLC, under Contract No. DE-AC52-06NA25946 with the U.S. Department of Energy

P280TEG100908

# Overview

- No unified program – but several pieces
- Procurement uses the Requisition Compliance Review process to authorize bringing chemicals on site
- Facility inspections during both safety evaluations and health hazard evaluations review the following
  - Material Safety Data Sheets
  - Storage
  - Labeling
  - Hazard Communication training
  - Personal protective equipment use vs. procedures

# Inventories

- Hazardous Substance Inventory
  - Annual inventory of amounts used for Environmental Protection Agency (EPA) reporting
  - Also used for emergency response
  - Connected to site-wide Facility Data Warehouse system
- Toxic Release Inventory (EPA Air Permit)
- Some facilities keep a running inventory (not a requirement)

# Transportation

- On-site transportation – HazTrack System
- HazMat notification system
