

EFCOG Env. SG Meeting Feedback

May Semi-annual meeting in New Orleans.

Feedback forms received: 12/19 (63%)

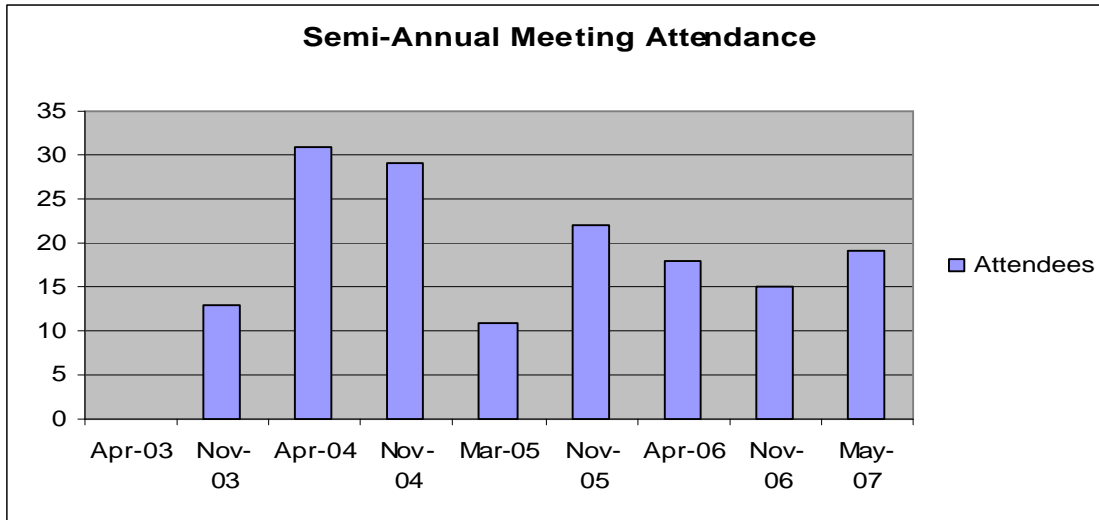

Comments:

1. Pace was rushed. Do two days or 1-3/4 day (end at 2pm) or include fewer presentations.
2. The round the table discussion is one of the most value added activities.
3. I like the idea of doing spring meeting in conjunction with another conference.
4. Some individuals monopolize time. We may need to enforce time limits on presentations and round tables.
5. Continue to hold this meeting in conjunction with environmental conferences, especially the National Environmental Partnership Summit. I found this approach to be very valuable both professionally and personally.
6. Room too cold.
7. 1-1/2 days is too short.
8. This was a good meeting but I think a slightly different format might spark more discussion on each topic. I enjoyed the presentations but think each should be followed by a short discussion. Also, more short breaks really would be good as it allows time for brief one on one discussion with people who sparked interesting points during discussion but were there was maybe not enough time to go in to detail.

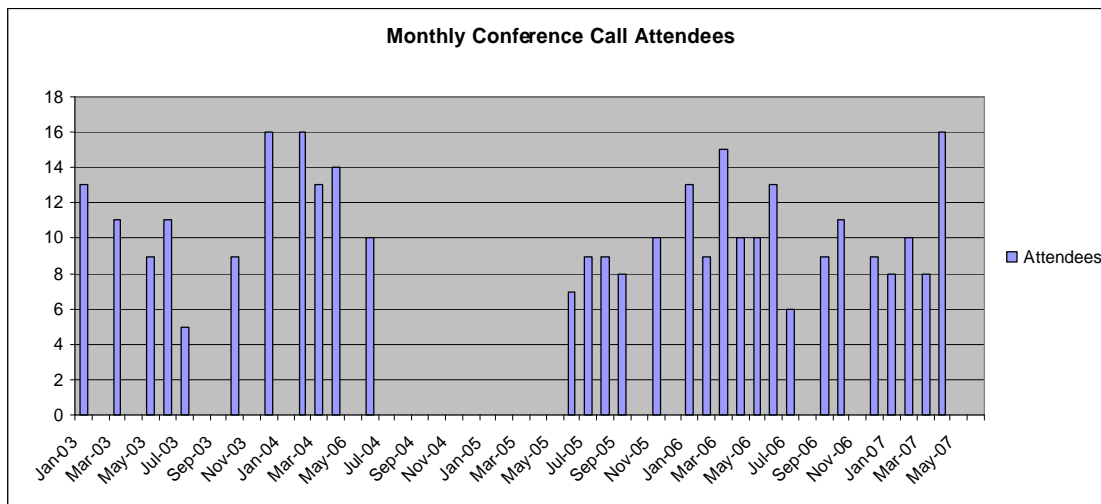

Future Modifications to address feedback:

- Increase length of semi-annual meeting to 1-1/2 to 2 full days.

- Allow greater time on the agenda for round table discussion.
- Allow discussion time following each presentation for discussion.
- Have formal time monitoring of presentations.
- Couple spring meeting with another conference.
- Provide frequent breaks.

Trend: Improving.

Trend: Conference call attendance increases prior to semi-annual meeting.
