

**EFCOG ISM Working Group
Environmental Subgroup
Conference Call Minutes**

May 11, 2006 Conference Call

PARTICIPANTS:

Bob Roulston, BWXT Pantex
Sonja Salzman, LANL
Megan Proctor, WCP
Roger Landon, WCP
Scott White, Honeywell-KCP

Orin Haworth, NTS
Judy McLemore, WIPP
Denny Hjersen, LANL
Alice Ikenberry, PNL
Maureen Jordan, NREL

Safety Topic--

Roger Landon: Boating Safety- anchor line became tangled with prop and pulled boat under. People not wearing PFDs but were rescued by nearby boaters.

Task Status—see modified task list.

Newest Task group: Environmental measures information. Judy spoke briefly to the topic and urged participants to respond.

Un-needed Materials & Chemicals effort: Alice will provide the presentation that PNL was working on this. There is a conference call on this effort 5/12/06. This will be a complex-wide effort, coordinated by Arnie Edelman from the Office of Science. PNL is working up its draft plan for response and will work to share it within the subgroup around May 26th.

Membership: How might we increase the participation of other sites in this and other WG meetings? Topic for discussion next call(s)?

Maureen: Send an invitation to each site's environmental point (if available)

Judy: Try using the DOE's P2 group list.

Use of the conference call time as a opportunity to present: This might bring in more people who have an interest in a specific issue; could be an opportunity for lessons learned, other presentations that have been done. Alice will provide something for the next meeting (Review of the current metrics used to monitor the health of the EMS at PNL). Judy: willing to present on interpretation of the metrics from her survey. After these two presentations, perhaps we can have Eric present on the results of his teams survey, and then evaluate continuing the opportunity.

Call ended at 2: 25 pm CST.
