

**EFCOG ISM Working Group
Environmental Subgroup
Conference Call Minutes**

July 13, 2006 Conference Call

PARTICIPANTS:

Shelly Grohs, BMI
Bob Roulston, BWXT Pantex
Orin Haworth, NSTech (LVNV)

Judy McLemore, WIPP
David Foles, Dyne McDermott
Maureen Jordan, NREL

Alice sent a message in the late morning that she would not be able to participate; Gary had previously noted he would be tied up.

Safety Topic--

From LVNV: if there is a lightning warning, grab your 1-Iron, because even God can't hit a 1-Iron

Tasks Status.

Task 1: Judy indicated she plans to kick this effort in the next few weeks with her team. She was concerned that there may have been some scope creep beyond the original intent of the task (Qualifications for the EMS Coordinator). Bob advised her that the expansion was a suggestion made by Joe Yanek, but was only a suggestion for the team to consider. Judy indicated that the team would focus on the original task for the time being.

Task 2: No update

Task 3: No update

Task 4: Per Orin, a survey is being finalized. They hope to get it out for use in August, with results from the survey to be available for presentation at the next meeting

Task 5: No update

Task 6: No update

Task 7: Judy noted that she had received input from a number of sites on the EMS metrics, and that this has been forwarded to Steve Woodbury for his consideration and use. She believes that the information would be useful to evaluate further. Maureen offered to join the task team to assist in that effort; Bob encouraged all participants to provide this information

Further Discussion:

Questions raised as to when next semi-annual meeting might be and where. Orin noted that even with the change in contractor, the LVNV location should still be available.

Call ended at 2:20 pm CST.
