

Chemical Safety/Lifecycle Management Recognition Program

Three levels of recognition:

- Site Programs
- Project
- Individual Contributors

Site Level Recognition Program—Need to do further research to identify implementation opportunities

Project Recognition Program—Leverage off the existing DOE P2 recognition program. EFCOG group will provide input to Josh for an additional category(s) to recognize in the area of Chemical Safety and Lifecycle Management.

Individual Level—Leverage off the EFCOG Award Program. The task group will need to do further research with this award program and provide criteria for evaluation.

- ü Award of Excellence—For Exceptional performance as demonstrated by specific recent accomplishments or by increased organizational productivity in meeting DOE's or EFCOG's requirements.
- ü Appreciation Award—Appreciation Award for outstanding support by an individual, both member and non-member, of EFCOG and its purposes.
- ü Teamwork Award—For exceptional support by a group of individuals who were instrumental in addressing a key DOE or EFCOG issue.

Additional Activities:

Look at VPP award program to see if awards/recognition programs exist. If so, see if we could include criteria for chemical safety.

Provide information to EFCOG members regarding other award programs such as the NPEP—National Partnership for Environmental Priorities.

Look at Labs 21 program for recognition programs

Provide input to Josh on our criteria and categories.

Conference call week of May 15th.
