

**EFCOG ISM WG Fall 06 Meeting**  
**Performance Analysis Task Group Agenda**  
**October 31, 2006**

The Performance Analysis Task Group is preparing guidance on analyzing performance.

Performance analysis applies to reported occurrences, PAAA noncompliances, 10CFR851 noncompliances and other information. For example, DOE Manual 231.1-2 requires the contractor to conduct quarterly performance analysis to identify recurring occurrences.

At the ISM WG Spring 06 Meeting, the Performance Analysis Task Group participants substantially revised the draft guidance.

The purpose of the meeting this October is to discuss the revised performance analysis paper, make final corrections and complete the draft guidance.
