

EFCOG Best Practices Program Meeting
Oak Ridge National Laboratory Conference Center
Tuesday, March 25, 2008
1:00-4:00 PM

The EFCOG Best Practices process is intended to communicate initiatives that are innovative, represent actions beyond generally accepted standards or application of standards to new functional area, or that significantly increase the efficiency or effectiveness of operations at DOE/NNSA Facilities.

The ISM & QA Working Group is responsible for establishing and maintaining the EFCOG Best Practices Program. Although the program and web page have been established, additional leadership and coordination are needed to re-invigorate the program to maximize effective utilization of EFCOG Best Practices throughout the DOE complex. This meeting will be a working session to develop a path forward in this re-invigoration effort.
