

ISM & QA WG Spring 2008 Meeting
Oak Ridge National Laboratory Conference Center
Oak Ridge, TN
March 25-27, 2008

Training Session: NQA-101- Manager's review of a formidable regulation

Everyone has a notion of what NQA-1 requires, but do you know what it includes? This course will briefly review the history of NQA-1's development. The instructor will review:

- Issues surrounding the various versions of NQA-1 and what fine year you should be using at your site
- Implementation of the regulation, how to best use the eighteen criteria to improve operations at you site
- Why do we have to use the regulation? How is it connected to other QA regulations such as 10CFR830.120, DOE Order 414.1c, 10 CFR Appendix B (Nuclear Power Plants & Fuel Reprocessing Standard)
- Who is ASME, and how are they connected to the DOE complex
- Review of the 18 basic and supplemental requirements
- DOE's position on NQA-1 and the likelihood that NQA-1 2008 will be blessed by NRC, and the implications
- Summary
