

James A. Morgan

Manager, Chemical Commodity Management Center (CCMC)
Westinghouse Savannah River Company

Jim Morgan was named Manager of the CCMC in March of 1996

In this capacity, he is the single point of contact for all chemical issues at Savannah River Site (SRS). He is responsible for the development, implementation and direction of the SRS Chemical Management Program.

Jim has more than twenty years of management and executive experience in energy related activities beginning with graduation from University of Maryland in 1977 with a Bachelor of Science and joining Delta Coal Sale as plant manger of a hydrocyclone coal cleaning facility. In 1979, he joined Otisca Industries Ltd. as manager of chemical extraction of coal research facility. Jim held various positions at Otisca, as plant manager, Manager of Operation, Manager of Construction, Operation and Engineering and Vice President of Fuel Production. He left Otisca in 1986 to start his own business, Chatham Coal Co. He joined the Westinghouse Savannah River Company in 1990. Before being named as Manager of the CCMC, Jim was Manager of Planning and Coordination.

He lives in Aiken, SC with his wife and four sons.
