Unreviewed Safety Question Refresher

Instructors: Bill Lapsansky Epsilon Systems Solutions, Inc.
 J. T. Beard J. T. Beard Inc, Engr Consultant

Course Description:

This course is intended to reemphasize to the qualified individual on the reasons behind USQ Process. It is a condensed version of the 3-day USQ course that is endorsed by the DOE Office of Nuclear and Facility Safety Policy (EH-22). The course covers the requirements and intent of 10 CFR Part 830, "Nuclear Safety Management," Subpart B, Section 830.203; and DOE G 424.1-1a, "Implementation Guide for Use in Addressing Unreviewed Safety Question Requirements." It reiterates the primary concepts, methods, and practices of the process learned in initial training. The course emphasizes *What* is done in the USQ process and *Why*, rather than the mechanics of the process.

Course Outline

0. *Course Introduction*
1. *Overview of USQ Process*
2. **USQ Screening – Part 1**
3. **USQ Screening – Part 2**
4. **USQ Determination (USQD)**
5. **Potentially Inadequate Safety Analysis (PISA)**
- X. **Course Examination**

10 CFR 830.203
DOE G 424.1-1A
