

Hazard Categorization

EFCOG SAWG
January 2003

Issue

- Hazard Categorization Standard developed to support forward looking design and operation
- Methods to reduce categorization needs clarification

Site Needs

- Multiple Sites looking for approach identified the following
 - Need tie to radiological dose base consistent with 10 CFR 835
 - Need to address non-point sources
 - Need rules for application of consequence evaluation criteria
 - Need alternative to threshold criteria
 - Need risk based approach to reasonable characterization

What's Going On?

- Arlen Schade –OR
- Fred March – Sandia
- Mac Carmen - RFETS

Proposed Guidance

- Draft EM Guidance Document prepared for review
- Provide comments and changes
- Establish basis for site support – EFCOG endorsement
- Recommend Approval
