**Brief description of the initiative:** In July of 2006 the Work Management Subgroup performed an assist visit as a pilot at the Hanford site. It was viewed by the host as well as the participants as having added value, and a good way to keep the Work Management Subgroup involved as part of a benchmarking experience, as well as adding value to the host facility in getting an independent review by people that are experienced in the field in a way that provides benefit to the host.

In 2007 the Work Management Subgroup will perform an assist visit to either SRS or Y-12 to assist in an area determined by the host.
